

Please make sure to download the ParentSquare app from your app store to your smartphone, as it will be our primary tool for health screening and expedited daily student check in.

As we increase the number of students coming onto campus, CVHS is using a new check in system for health screening called **ParentSquare**. **ParentSquare** will be our official system for daily health screening for staff and students, so we encourage you to download the app ASAP if your student participates in any of the cohorts on campus.

For Parents/Students: We would like each parent to download the **PARENTSQUARE APP (from your app store)** to your phone. Follow these instructions to get text notifications as well as school alerts and updates (we promise not to spam your phone with needless texts...too much!)

1. Download the Parent Square App and create an account using the same email as you have on file with the school
2. Click on the three lines at the top left of the screen, then select account
3. Select Preferences
4. Select Notifications
5. Change text notifications to instant

For help with the ParentSquare app, you can submit a help request at:
