Subject: Fwd: California state study - data request: count of school busses
To:

Dear Madam/Sir, this is a reminder to provide a response to our email in which we sought information under the California Public Records Act ("CPRA") (Gov. Code, § 6250, et seq.).

Best, Damra M

Subject: California state study - data request: count of school busses
To: <[REDACTED]>

Hi,
I hope all is well.

We are doing a state-wide study on the transition of school transportation from fossil fuels to zero-emission, and are looking for data on school buses for your school district.

We need rather simple, easily available data, and kindly ask you to share the requested data at the earliest, and latest by August 4th.

I thank you for your cooperation.

Kind regards,
Damra Muminovic
Zero Emission School Buses Initiative

Data needed for your school district - Please share at the earliest, and by the latest within one week from today, August 4th.

Zero Emission School Buses	Total vehicles
	Annual mileage
	Annual energy cost <i>(provide if available)</i>
Fossil Fuel Busses	Total vehicles
	Annual mileage
	Annual energy cost <i>(provide if available)</i>
New Busses Planned	Zero Emission <i>(enter number)</i>
	Fossil Fuel <i>(enter number)</i>

Why this study?

School buses are the largest form of mass transportation in the US. This 480 000 vehicle fleet is the [largest emission source of greenhouse gases of all in the transportation sector](#). Transitioning to zero-emission buses across the country is an important and [significant contribution to our climate goals](#). California aims to meet Zero Emission targets and to decrease [school children's exposure to both cancer-causing and smog-forming pollution from school buses](#) which is a real threat according to research from California Air Resources Board.
