Submit a California Public Records Act Request to Carmel USD

The Carmel Unified School District (CUSD) is committed to transparency and providing easy access to public records pursuant to the California Public Records Act (CPRA). The California Public Records Act gives the public the right to access records created and maintained by public agencies in the course of their normal business.

Pursuant to Government Code Section 6252(e), a public record is defined as “any writing containing information relating to the conduct of the public’s business prepared, owned, used, or retained by any state or local agency regardless of physical form or characteristics.” Public records requests may be used to obtain "records," which include a wide variety of documents and other materials (including print, photographic, and electronic formats) that were created or obtained by the organization and are, at the time the request is filed, in the organization’s possession and control.

Records subject to disclosure under the CPRA may include email or other communications from members of the public or which reference them. While the District reviews all responsive records to determine if this information should be disclosed, in many cases references to members of the public, or the content of their communications to the District are subject to disclosure. Permissible exemptions from disclosure include documents that invade an individual’s right to privacy (e.g., privacy in certain personnel, medical, or student records) or hinder the government’s need to perform its assigned functions in a reasonably efficient manner (e.g., maintaining confidentiality of investigative records, official information, records related to pending litigation, and preliminary notes or memoranda).

All requests will be posted to the District’s CPRA webpage.

Name of requestor: *
First and last name
Football Lights

Email of requestor: (Responses will be provided to this email address) *

It should be noted that unlike at the pool facility, where lighting can be modified to adjust between practices and games given the size of the pool and underwater lighting available, in order to maintain safe and/or sufficient lighting levels for practices and games, stadium lighting would need to be maintained at the same level of lighting intensity across the entire field for all practices and games as the Illuminating Society of Engineers does not provide lighting standards for reduced levels for practices (Dan Paul, e-mail communication, August 10, 2022). Therefore, lighting conditions at the stadium would remain consistent for all sports practices and games. Additionally, the light use analysis contained in this section includes junior varsity games, which are typically played right before varsity games and are unlikely to need lights (even in winter).
